

## WAND Taxonomy Catalog

12-12-2008

## WAND Complete Product and Service Master Taxonomy

The WAND Product and Service Master Taxonomy is a controlled vocabulary of subject descriptors for products and services. The industry-wide terminology covers all types of products and services including, but not limited to, manufactured goods, processed goods, and raw materials (including plants, animals, and minerals). Service descriptors encompass services available in business, manufacturing, science, education, agriculture, medicine, entertainment, transportation and other areas. As a master thesaurus, it can be used to create various, unique combinations of micro-thesauri to meet a wide range of specific, vertical requirements.

The WAND Product and Service taxonomies consist of a controlled vocabulary of terms with multiple relationships such as hierarchical parent-child relationships (Broader Terms, Narrower Terms), associated types (Related Terms), and synonyms ("Use For" Terms). Many of the terms are associated to attribute and attribute value templates for specification based descriptions. In addition, the WAND taxonomies are translated into multiple languages and cross-mapped to many alternate classification systems including UNSPSC, NAICS, SIC, Harmonized Codes and Yellow Page headings.

### Data Points:

- Total Product and Service Terms: 79,927
- Total Feature Values: 264,097
- Total Option Values: 1,133,268

(As of April 29, 2008)

Includes the following top level headings:

Agriculture and Forestry  
Arts, Crafts and Hobbies  
Automotive  
Books, Music and Video  
Building and Construction  
Clocks and Watches  
Computer & Information Tech.  
Consumer Electronics  
Communications  
Education and Training  
Electrical and Electronics  
Environmental  
Fashion and Apparel  
Fine Art, Antiques & Collect.  
Food and Beverage  
Gifts and Jewelry  
Home and Garden

Industrial Equip. & Supplies  
Medicine  
Metals  
Minerals, Mining and Drilling  
Office Equipment & Supplies  
Packaging  
Personal Care  
Photography  
Plastics and Rubber  
Safety and Security  
Science and Technology  
Services  
Sports and Recreation  
Textiles and Leather  
Toys and Games  
Transportation

# WAND Agriculture and Forestry Taxonomy

The WAND Agriculture and Forestry Taxonomy covers products and services related to the fields of agriculture and forestry. It includes information on plants, animals, agricultural equipment and related supplies, timber, forestry and logging equipment. Services related to horticulture, crops, and animals are also covered.

Unstructured data is believed to account for 80 to 85% of a typical organization's internal information. Company documents, articles, spend data, and other unstructured information needs to be quickly and easily accessible by your organization's employees. A company's products and service are its backbone and a high-quality and well-structured vocabulary of the standard product and service terms that are important to your company is crucial for your employees to unlock the value of unstructured data in your company.

## Applications

The WAND Agriculture and Forestry Taxonomy can be licensed and integrated into your existing intranet, content management application, spend management system, spend analysis application, knowledge management portal, or any other application that would benefit from the power of a robust taxonomy-based search.

Unstructured information from a variety of repositories can be consistently organized and searched by:

- Relevant and intuitive product and service categories
- Hierarchical drill-down browsing
- Numerous slices or segments of the taxonomy
- Related terms which may link to previously unknown information
- Filtered Search
- Any combination of taxonomy pathways which funnel the users to the information they need

## Structure and Delivery

The WAND Agriculture and Forestry taxonomy consist of a controlled vocabulary of terms with multiple relationships such as hierarchical parent-child relationships, related terms, and synonyms. Many of the terms are associated to attribute and attribute value templates for specification based descriptions. Language translations of the product and service terms (not attributes/attribute values) are available in English, French, German, Spanish, Italian, Portuguese, Japanese, Simplified Chinese, Traditional Chinese, Korean, and Vietnamese. The Taxonomy is cross-mapped to many alternate classification systems including UNSPSC, NAICS, SIC, Harmonized Codes and Standard Yellow Page headings

Data can be delivered in a variety of format, including XML files, Access Database files, and csv, and is delivered via a password protected FTP site.

## Data Points:

- Total Product and Service Terms: 9,245
- Total Feature Values: 32,310
- Total Options Values: 143,286

(As of April 29, 2008)

Below are the top level headings and a sampling of subheadings:

### Agricultural Buildings

Barns

### Agricultural Equipment

Aquaculture Equipment

### Agricultural Products

Dairy Products

### Agricultural Services

Beekeeping

### Animal Equipment and Supplies

Pet Beds

### Animal Services

Breeders

### Animals

Dogs

### Fishing Services

Fish Hatcheries

### Forestry and Logging Equipment

Logging Equipment Parts

### Forestry Services

Forestry Engineers

### Horticulture Supplies

Soil Treatment Products

Example of the WAND Agriculture and Forestry Taxonomy:

#### Phosphate Fertilizers

Synonyms / Non-Preferred Term(s):

- Phosphatic Chemical Fertilizers
- Phosphatic Mineral Fertilizers

Related Term(s):

- Slag

#### Ammonium Phosphate, Dibasic

Synonyms / Non-Preferred Term(s):

- DAP Fertilizer
- Diammonium Hydrogenorthophosphate
- Diammonium Phosphate

#### Ammonium Phosphate, Monobasic-Di

#### Calcium Superphosphate

Synonyms / Non-Preferred Term(s):

- Lime Phosphate
- Monobasic Calcium Phosphate
- Superphosphates

#### Nitrate-Phosphate Fertilizers

#### Plant Food

Synonyms / Non-Preferred Term(s):

- Plant Food

#### Plant Growth

Synonyms / Non-Preferred Term(s):

- Plant Growth

# WAND Automotive Taxonomy

The WAND Automotive Taxonomy covers products and services related to the fields of original equipment manufacturer (OEM) and aftermarket parts for the automotive industry. It concentrates on performance parts but also includes some of the major accessories. The package is oriented to passenger vehicles: automobiles, motorcycles, sports vehicles, light trucks, etc. It does not attempt to include special vehicles such as fork lift trucks, tractors, emergency vehicles, military vehicles, etc. Automotive services including inspection, repair and maintenance are also covered here.

Unstructured data is believed to account for 80 to 85% of a typical organization's internal information. Company documents, articles, spend data, and other unstructured information needs to be quickly and easily accessible by your organization's employees. A company's products and service are its backbone and a high-quality and well-structured vocabulary of the standard product and service terms that are important to your company is crucial for your employees to unlock the value of unstructured data in your company.

## Applications

The WAND Automotive Taxonomy can be licensed and integrated into your existing intranet, content management application, spend management system, spend analysis application, knowledge management portal, or any other application that would benefit from the power of a robust taxonomy-based search.

Unstructured information from a variety of repositories can be consistently organized and searched by:

- Relevant and intuitive product and service categories
- Hierarchical drill-down browsing
- Numerous slices or segments of the taxonomy
- Related terms which may link to previously unknown information
- Filtered Search
- Any combination of taxonomy pathways which funnel the users to the information they need

## Structure and Delivery

The WAND Automotive taxonomy consist of a controlled vocabulary of terms with multiple relationships such as hierarchical parent-child relationships, related terms, and synonyms. Many of the terms are associated to attribute and attribute value templates for specification based descriptions. Language translations of the product and service terms (not attributes/attribute values) are available in English, French, German, Spanish, Italian, Portuguese, Japanese, Simplified Chinese, Traditional Chinese, Korean, and Vietnamese. The Taxonomy is cross-mapped to many alternate classification systems including UNSPSC, NAICS, SIC, Harmonized Codes and Standard Yellow Page headings

Data can be delivered in a variety of format, including XML files, Access Database files, and csv, and is delivered via a password protected FTP site.

# WAND Computers and Information Technology Taxonomy

The WAND Computers and Information Technology Taxonomy covers products and services related to the fields of computer-assisted technologies, software and the basic computer equipment itself. Technology specific to the collection and use of information is covered here. Computer services range from basic technology management and maintenance to modeling and simulation services.

Unstructured data is believed to account for 80 to 85% of a typical organization's internal information. Company documents, articles, spend data, and other unstructured information needs to be quickly and easily accessible by your organization's employees. A company's products and service are its backbone and a high-quality and well-structured vocabulary of the standard product and service terms that are important to your company is crucial for your employees to unlock the value of unstructured data in your company.

## Applications

The WAND Computers and Information Technology Taxonomy can be licensed and integrated into your existing intranet, content management application, spend management system, spend analysis application, knowledge management portal, or any other application that would benefit from the power of a robust taxonomy-based search.

Unstructured information from a variety of repositories can be consistently organized and searched by:

- Relevant and intuitive product and service categories
- Hierarchical drill-down browsing
- Numerous slices or segments of the taxonomy
- Related terms which may link to previously unknown information
- Filtered Search
- Any combination of taxonomy pathways which funnel the users to the information they need

## Structure and Delivery

The WAND Computers and Information Technology taxonomy consist of a controlled vocabulary of terms with multiple relationships such as hierarchical parent-child relationships, related terms, and synonyms. Many of the terms are associated to attribute and attribute value templates for specification based descriptions. Language translations of the product and service terms (not attributes/attribute values) are available in English, French, German, Spanish, Italian, Portuguese, Japanese, Simplified Chinese, Traditional Chinese, Korean, and Vietnamese. The Taxonomy is cross-mapped to many alternate classification systems including UNSPSC, NAICS, SIC, Harmonized Codes and Standard Yellow Page headings

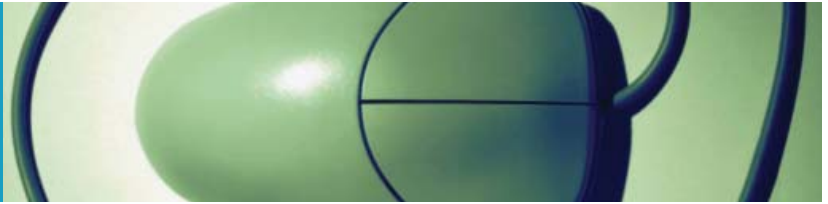

Data can be delivered in a variety of format, including XML files, Access Database files, and csv, and is delivered via a password protected FTP site.

# WAND Gifts and Jewelry Taxonomy

The WAND Gifts and Jewelry Taxonomy covers products and services related to the gift and jewelry fields. Included are gemstones, all types of jewelry and jewelry supplies as well as miscellaneous gift items, precious metals and associated services such as jewelry making.

Unstructured data is believed to account for 80 to 85% of a typical organization's internal information. Company documents, articles, spend data, and other unstructured information needs to be quickly and easily accessible by your organization's employees. A company's products and service are its backbone and a high-quality and well-structured vocabulary of the standard product and service terms that are important to your company is crucial for your employees to unlock the value of unstructured data in your company.

## Applications

The WAND Gifts and Jewelry Taxonomy can be licensed and integrated into your existing intranet, content management application, spend management system, spend analysis application, knowledge management portal, or any other application that would benefit from the power of a robust taxonomy-based search.

Unstructured information from a variety of repositories can be consistently organized and searched by:

- Relevant and intuitive product and service categories
- Hierarchical drill-down browsing
- Numerous slices or segments of the taxonomy
- Related terms which may link to previously unknown information
- Filtered Search
- Any combination of taxonomy pathways which funnel the users to the information they need

## Structure and Delivery

The WAND Gifts and Jewelry taxonomy consist of a controlled vocabulary of terms with multiple relationships such as hierarchical parent-child relationships, related terms, and synonyms. Many of the terms are associated to attribute and attribute value templates for specification based descriptions. Language translations of the product and service terms (not attributes/attribute values) are available in English, French, German, Spanish, Italian, Portuguese, Japanese, Simplified Chinese, Traditional Chinese, Korean, and Vietnamese. The Taxonomy is cross-mapped to many alternate classification systems including UNSPSC, NAICS, SIC, Harmonized Codes and Standard Yellow Page headings

Data can be delivered in a variety of format, including XML files, Access Database files, and csv, and is delivered via a password protected FTP site.

# WAND Home and Garden Taxonomy

The WAND Home and Garden Taxonomy covers products and services related to the home and gardens fields. It includes home furnishing, household products, home repair, lawn and garden products, appliance, lawn care and home improvement services. Personal services for the home and household are also included here.

Unstructured data is believed to account for 80 to 85% of a typical organization's internal information. Company documents, articles, spend data, and other unstructured information needs to be quickly and easily accessible by your organization's employees. A company's products and service are its backbone and a high-quality and well-structured vocabulary of the standard product and service terms that are important to your company is crucial for your employees to unlock the value of unstructured data in your company.

## Applications

The WAND Home and Garden Taxonomy can be licensed and integrated into your existing intranet, content management application, spend management system, spend analysis application, knowledge management portal, or any other application that would benefit from the power of a robust taxonomy-based search.

Unstructured information from a variety of repositories can be consistently organized and searched by:

- Relevant and intuitive product and service categories

# WAND Personal Care Taxonomy

The WAND Personal Care Taxonomy covers products and services related to the personal care industry. It includes bath and beauty products, personal care appliances, perfumes and weight management products. Personal grooming and relaxation services are also included.

Unstructured data is believed to account for 80 to 85% of a typical organization's internal information. Company documents, articles, spend data, and other unstructured information needs to be quickly and easily accessible by your organization's employees. A company's products and service are its backbone and a high-quality and well-structured vocabulary of the standard product and service terms that are important to your company is crucial for your employees to unlock the value of unstructured data in your company.

## Applications

The WAND Personal Care Taxonomy can be licensed and integrated into your existing intranet, content management application, spend management system, spend analysis application, knowledge management portal, or any other application that would benefit from the power of a robust taxonomy-based search.

Unstructured information from a variety of repositories can be consistently organized and searched by:

- Relevant and intuitive product and service categories
- Hierarchical drill-down browsing
- Numerous slices or segments of the taxonomy
- Related terms which may link to previously unknown information
- Filtered Search
- Any combination of taxonomy pathways which funnel the users to the information they need

## Structure and Delivery

The WAND Personal Care taxonomy consist of a controlled vocabulary of terms with multiple relationships such as hierarchical parent-child relationships, related terms, and synonyms. Many of the terms are associated to attribute and attribute value templates for specification based descriptions. Language translations of the product and service terms (not attributes/attribute values) are available in English, French, German, Spanish, Italian, Portuguese, Japanese, Simplified Chinese, Traditional Chinese, Korean, and Vietnamese. The Taxonomy is cross-mapped to many alternate classification systems including UNSPSC, NAICS, SIC, Harmonized Codes and Standard Yellow Page headings

Data can be delivered in a variety of format, including XML files, Access Database files, and csv, and is delivered via a password protected FTP site.

# WAND Personal Care Taxonomy

## Data Points:

- Total Product and Service Terms: 1,780
- Total Feature Values: 4,117
- Total Option Values: 11,758

(As of April 29, 2008)

Includes the following top level headings:

## Personal Care Products

- Beauty Salon Machines
- Body Cooling Products
- Cosmetic Raw Materials
- Dietary Supplements
- Estheticians Equipment and Supplies
- Fragrances
- Hair Salon Equipment
- Nutritional Supplements
- Personal Health Goods
- Personal Medical Products
- Restroom Bathroom Articles
- Scents
- Spa Equipment

# WAND Textiles and Leather Taxonomy

The WAND Textiles and Leather Taxonomy covers products and services relating to the textile and leather industries. It includes yarns, fabrics, fur, leather, textile and leather working equipment and supplies and leather and textile manufacturing services.

Unstructured data is believed to account for 80 to 85% of a typical organization's internal information. Company documents, articles, spend data, and other unstructured information needs to be quickly and easily accessible by your organization's employees. A company's products and service are its backbone and a high-quality and well-structured vocabulary of the standard product and service terms that are important to your company is crucial for your employees to unlock the value of unstructured data in your company.

## Applications

The WAND Textiles and Leather Taxonomy can be licensed and integrated into your existing intranet, content management application, spend management system, spend analysis application, knowledge management portal, or any other application that would benefit from the power of a robust taxonomy-based search.

Unstructured information from a variety of repositories can be consistently organized and searched by:

- Relevant and intuitive product and service categories
- Hierarchical drill-down browsing
- Numerous slices or segments of the taxonomy
- Related terms which may link to previously unknown information
- Filtered Search
- Any combination of taxonomy pathways which funnel the users to the information they need

## Structure and Delivery

The WAND Textiles and Leather taxonomy consist of a controlled vocabulary of terms with multiple relationships such as hierarchical parent-child relationships, related terms, and synonyms. Many of the terms are associated to attribute and attribute value templates for specification based descriptions. Language translations of the product and service terms (not attributes/attribute values) are available in English, French, German, Spanish, Italian, Portuguese, Japanese, Simplified Chinese, Traditional Chinese, Korean, and Vietnamese. The Taxonomy is cross-mapped to many alternate classification systems including UNSPSC, NAICS, SIC, Harmonized Codes and Standard Yellow Page headings

Data can be delivered in a variety of format, including XML files, Access Database files, and csv, and is delivered via a password protected FTP site.
